Skills

- **Languages:** JavaScript, Java(OOP), TypeScript, C++, Python
- **Frameworks & Libraries:** Node.js, Express.js, React.js, Tailwind CSS, Spring-Boot(Basic)
- **Databases:** PostgreSQL, MongoDB, Mongoose, MySQL
- **Tools & Platforms** Git/GitHub, UNIX/Linux, Docker, Vercel, Firebase, AWS

Experience

◆ Backend Software Engineer (Intern)

ANTT Robotics R&D

May 2024 -

Dhaka, Bangladesh

Tech Stack: **TypeScript, Node.js, Express.js, MongoDB, Mongoose, React.js, Tailwind CSS**

- Develop **RESTful** APIs using Node.js and Express.js, ensuring efficient communication between frontend and backend integrating MongoDB with Mongoose to store and manage data.
- Use **TypeScript** and **Zod** to enhance code quality, maintainability, and developer productivity.
- Test and debug APIs using tools like **Postman** ensuring robustness and reliability and Document API endpoints and system architecture for better understanding.

Education

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar, India

August 2020 - May 2024

Bachelor of Technology(**B.Tech**) in Computer Science and Engineering(**CSE**)

CGPA: 7.80 out of 10

Coordinated several **workshops** for fellow juniors on **Data Structures and Algorithms**, Version Control Systems (**Git/GitHub**), and **Open Source Contribution**.

Projects

◆ PrerokGlobal | Shipment and Logistics Management Web Application

[Live Site](#) | [GitHub](#)

Tech Stack: **TypeScript, React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, Firebase, Vercel**

- Lead a group of **six** to develop this Project that offers comprehensive **logistics solutions** including **real-time shipment tracking**, instant **online quoting**, and efficient **booking management**.
- Features includes user accounts for **personalized tracking**, integrated **chat support**, and assistance with **customs documentation**, for seamless shipping experience.
- Dedicated Return management and **Forum** for community engagement, making it a one-stop platform for all shipping and logistics needs.

◆ FitBuzz (Automated Fitness Training Center)

[Live Site](#) | [GitHub](#)

Tech Stack: **React, Tailwind, Express.js, Firebase, MongoDB, JWT**

- Robust User Ecosystem: Secure user authentication, role-based access, and personalized dashboards for a tailored experience.
- Comprehensive Class Management: Detailed scheduling, enrollment, and management tools for trainers and users.

Achievements and Extra-Curricular Activities

- Achieved the fully-funded SII Scholarship from the government, covering 4 years B.Tech course.
- Actively involved in Algorithmic Problem Solving in various online judges like [LeetCode\(Solved:350+, rating: 1447\)](#), and [HackerRank](#) solving more than 500 problems.
- Actively write technical blog posts on my [Blog](#) and publish videos on my [YouTube Channel](#).
